

Romain Racamier-Lafon

Tech Lead – Senior Front-end Engineer

romain.racamier@gmail.com • +33 6 58 47 67 88 • Strasbourg, FR • 37 years old
github.com/Shuunen ↗ • linkedin.com/in/romain-racamier ↗ • humacode.fr ↗

Tech Lead and front-end specialist, 15 years of experience across 5 consecutive lead roles. I take over front-ends that have drifted — **Vue 2 to Vue 3**, **JavaScript to TypeScript**, **AngularJS to React** — and hand back a shared component library, tools and a test suite the team can maintain without me. I have led teams of 2 to 8 developers at **Eu-Lisa**, **Amundi WeSave** and **Collectif Energie**: architecture, technical standards, code review, recruitment and mentoring, a role I also fill as a volunteer for people retraining into the field. Maintainer of multiple open-source projects.

EXPERIENCES

Eu-Lisa • Web Developer – Tech Lead

Strasbourg • Freelance • On-site • Mar 2025 → Present

The European Union agency for large-scale IT systems, needed two new web applications to handle Europe-wide processes. I built them alongside a shared component library and tooling, distributed across several repositories through an internal registry.

- Tech Lead in a team of 8 developers, participated in recruitment
- Built two new web applications supporting Europe-wide processes
- Created a shared component library and a set of internal tools, released to a private **Artifactory** registry
- Structured the codebase across several repositories, including pnpm workspace monorepos driven by **Turbo**
- Defined the architecture and technical standards, reviewed code and mentored the team
- **Impact**: two applications delivered, unified **UX/UI** through the shared library, unit and **E2E** test coverage

Batvoice AI • Web Developer – Tech Lead

Paris • Freelance • Remote • Nov 2024 → Feb 2025

An artificial intelligence product company, had a front-end running on **Vue 2**, which was reaching end of life. As tech lead, I led the migration to **Vue 3** and put the practices in place to keep the application maintainable.

- Tech Lead in a team of 2 people
- Migrated the whole application from **Vue 2 to Vue 3**
- Created a component catalog to remove duplication and speed up **UI** development
- Developed new features and fixed bugs on the product
- Set up the **Cypress E2E** test suite to secure non-regression
- **Impact**: **Vue 2 to Vue 3** migration completed within the 3-month mission on a 5-year-old application, non-regression secured by **E2E** tests

SKILLS

Front-end

- TypeScript, JavaScript, ES6+
- React, Next.js, Material-UI
- Vue 2, Vue 3, Nuxt, Vuetify
- Angular, AngularJS, VanillaJS
- Tailwind CSS, ShadCN, Radix
- Sass, Scss, BEM, CSS 3, HTML 5
- Design systems, component libraries
- Web Components, PWA, SPA, SSR, SSG

Testing & quality

- Vitest, Jest, Mocha
- Cypress, Playwright, Storybook
- TDD, BDD, Gherkin
- ESLint, Oxlint, Biome, Prettier
- Code coverage, Google Lighthouse
- Accessibility, WCAG, RGAA
- Core Web Vitals, performance optimization

Back-end & data

- Node.js, Express.js, NestJS
- REST, JSON, Zod
- PHP, MySQL, SQLite

Tooling & delivery

- Vite, EsBuild, Webpack, Parcel
- Pnpm, Npm, Yarn, Bun
- Monorepos, Turbo, Nx, Artifactory
- Git, GitFlow, GitHub, GitLab
- CI/CD, GitHub Actions

Collectif Energie · Web Developer – Tech Lead

Nantes · Freelance · Hybrid · Jan 2024 → Sep 2024

An energy broker, entrusted me with the tech lead role to support and structure the technical team through the creation of a **monorepo**.

- ▶ Tech Lead in a team of 6 people
- ▶ Developed new features and maintained a **Nuxt 3** application
- ▶ Created a **monorepo** to speed up development, centralize libraries, and align practices
- ▶ Migrated existing sites and libraries to the **monorepo**
- ▶ Built a **React** component library based on **ShadCN**, **Radix UI** & **Tailwind CSS**
- ▶ Implemented and participated in the recruitment process
- ▶ **Impact:** sites and libraries centralized in a single **monorepo**, practices aligned across a team of 6, unified **UX / UI**, improved developer experience

Amundi WeSave · Web Developer – Co-Tech Lead

Paris · Full-time · Hybrid · Sep 2022 → Dec 2023

A company specialized in wealth management, wanted to modernize its main application to handle contracts. I led the migration of the front-end stack to more recent technologies, while supervising the ongoing development and maintenance of the application.

- ▶ Co-Tech Lead in a team of 4 people
- ▶ Migrated a **Nuxt** project from **JS** & **Vue 2** to **TypeScript** & **Vue 2.7**
- ▶ Developed new features and maintained the main application
- ▶ Created a custom **ESLint** plugin
- ▶ Participated in the recruitment process
- ▶ **Impact:** main application fully typed, performance improvements, easier maintenance for a team of 4

Euro Information · Web Developer – Tech Lead & Mentor

Strasbourg · Full-time · On-site · Sep 2018 → Sep 2022

Employed by **Inetum** and on assignment for their client **Euro Information**, I took charge of the technical direction of several strategic web projects, with the mission of centralizing the **UI/UX** of future projects through a unified component library, and of redesigning the **Lyf.eu** website with modern technologies. In this context, I also acted as a tutor to support the training of a junior developer.

- ▶ Built a component library to centralize the **UI/UX** of all current and future web projects
- ▶ Redesigned the **Lyf.eu** website, migrating from an old **AngularJS** stack to a fresh **Nuxt SSG** using **Vue** & **Tailwind CSS**
- ▶ Developed new features and maintained the internal framework used to manage **Lyf Pay** application data
- ▶ Mentored and trained my intern on an activity tracking project
- ▶ **Impact:** consistent **UI/UX** across projects, reduced development time, client satisfaction with the new processes, my mentee got hired

Leadership & methods

- ▶ Technical direction, architecture & standards
- ▶ Code review, mentoring, tutoring
- ▶ Recruitment & technical interviews
- ▶ Scrum, Agile ceremonies
- ▶ Active listening, Neuro-Linguistic Programming (NLP)

LANGUAGES

French

Mother tongue

English

Full professional proficiency: technical and conversational, used daily in international teams

INTERESTS

Hobbies

- ▶ Volunteering, support
- ▶ Personal projects
- ▶ Photo, macro and digital editing
- ▶ Design/logo creation
- ▶ Hiking, walking, cycling
- ▶ Cinema, movies and a few series

EDUCATION

Master, Computer Engineering Manager (work-study, French RNCP level I) ↗

IIA Laval · Sep 2010 → Sep 2011

- ▶ Web programming
- ▶ Project management
- ▶ C#
- ▶ SQL Server
- ▶ MVC pattern

Niji · Web Developer – Tech Lead

Nantes · Full-time · On-site · Oct 2016 → Jun 2018

At **Niji**, a digital agency in Nantes, I delivered five client front-ends in twenty months, across retail, insurance, energy and real estate.

- For **Auchan**: created a chatbot with **DialogFlow** for online drive visitors
- For **Cipav**: redesigned the extranet in **Angular** espace-personnel.lacipav.fr ↗
- For **Enedis**: maintained **Ionic** application for **iOS** & **Android** play.google.com ↗
- For **Verlingue Immobilier**: created a professional subscription portal
- For **Système U**: created a management web app on tablet for drive employees
- **Impact**: 5 client front-ends delivered in 20 months across retail, insurance, energy and real estate, 2 applications published on Apple and Google stores

TypeScript Angular 4 AngularJS Vue 2 Ionic HTML 5 CSS 3 Sass Git

Amdocs · Web Developer – Front-end Lead

Rennes · Full-time · On-site · Apr 2014 → Sep 2016

Employed by **Niji** and on assignment for their client **Amdocs**, I took charge of the front-end development of a main project aimed at optimizing the management of a telecom offer catalog.

- Front-end lead on the main project which lasted 2 years
- Creation of web applications aimed at managing a catalog of telecom offers
- Setting up unit tests, **E2E** tests via **PhantomJS** and the coverage report
- Sent to Sydney, Australia for 6 weeks as emergency reinforcement to help the telecom operator **Optus** ship the rework of their website
- **Impact**: reduced time spent handling offers over a 2-year project, positive adoption by internal users, stability secured by unit and **E2E** tests

JavaScript Backbone.js jQuery RequireJS HTML 5 CSS 3 Sass Perforce

Ouest-France · Web Developer – Front-end Lead

Rennes · Full-time · On-site · Nov 2012 → Mar 2014

- Front-end lead on the **Drupal 7** redesign of a national news website ouest-france.fr ↗, 3 themes shipped (public, editorial back-office and mobile), loading times and **SEO** optimized

JavaScript jQuery Bootstrap 2 Drupal 7 Google Analytics Google Tag Manager

Alyotech · Web Developer

Rennes · Professional training contract · Oct 2011 → Oct 2012

VOLUNTEERING

ExplorJob · [Volunteer](#) ↗

Sep 2022 → Present

I guide students as well as working professionals looking for a career change, helping them become web developers or simply discover the job. The exchanges happen over video calls, where I answer their questions: what a developer's day really looks like, which studies matter, the skills and salary to aim for, where to learn. I also review their CVs and support them through the job hunt.

Dema1n.org · [Volunteer](#) ↗

Apr 2022 → Present

I guide several students in navigating their career paths and making informed decisions in the job market. I follow the same people over months or years, reviewing their CVs and applications, but most of the time the support is human before it is professional: helping them through the stress, anxiety and self-doubt that hold them back or slow them down.

PROJECTS

[Shuutils](#) ↗

Open-source library

Dependency-free **TypeScript** utility library I have maintained for years, 13,000 downloads a year.
